### ABSTRACT

*Community Funding System (CFS) is a system that will help community to apply for fund. Community that can use this system are those who need for help in term of financial. It involves donators and community. This system was inspired from crowd funding. Those who have financial problems can register to this system. The donators can choose to who they want to donate. The main purpose of this system is to help community to get a donation. It will simplify the process and way to get the donation. Target audience for this system is students and community. The information that need to be fill up in this system such as name, identification card, contact number, and etc. In description space, they need to write a description that state why they need for fund. For example, for students they can say that they need financial help in order to further their study. For community in low class level, they can register to this system to apply for financial assistance in their daily life. This is an effective way to help community that need financial help. In the nutshell, this system will help community to help in getting a donation in an easy way.*
