ABSTRACT

Hostel is a facility that every university provide to their students, this facility is very important towards students especially the students that living far away from their hometown. In UiTM Machang, the university provided 5 hostels for the students. Students are required to follow the procedure to be able to stay at the hostel for every semester. However, there are time restraint in register college. Therefore, the researcher would like to propose a system for the students and the hostel warden which is Smart College Management System (SCMS). The features of this systems are college registration, student's complain, rooms selection, pos laju tracking, sticker application.
