### **ABSTRACT**

*With the many of club for motorcycles and cars these days so people having trouble to register with the club that their wanted. The problem of these clubs that they do not in a one system for ease the users to register as members. This system will collaborate with all the automotive clubs that have in Malaysia to collaborate to ease their gain new members for the club. So, that the owners of cars and motorcycles doesn't have any trouble in future to register as members. For example, the owner of Perodua Myvi interested in the Myvi club can search the suitable club for the users in the system. First, the users can select type of vehicle and nearest location of users wanted. After that, the users can know the available automotive club that available in the system and users can select any club that they want. Then, the users need to register as a new member and fill in the form and detail about the vehicle owner. The users can proceed to online payment as to pay the registration fees. Moreover, this system not only can register as members but also the users can check the schedule of convoy in a year.*

**Keywords:** Cars, register and motorcycles.
