ONLINE WEB DESIGN AND CONTENT MANAGEMENT (IMS607)

TITLE :

ONLINE TOURNAMENT REGISTRATION SYSTEM

PREPARED BY:

ALIA FARHANA BINTI YUSOF (2017275928)

PREPARED FOR:

SIR MOHAMAD RAHIMI BIN MOHAMAD ROSMAN

GROUP :

D1IM2455A

SUBMISSION DATE :

13TH DICEMBER 2018

ACKNOWLEDGEMENT

In performing my assignment, it's a successful one I had to take the help and guideline of some respected persons. First of all I am grateful to Allah who gives me sound mind & sound health to accomplish my assignment. The completion of the report gives me much Pleasure. But it is not my credit in this endeavour. I would like to thank my gratitude Sir Mohamad Rahimi Bin Mohamad Rosman who is my Course Instructor in system subject at UiTM Machang Cawangan Kelantan, for giving me a good guideline for assignment.

I would like to deliver my whole hearted thanks to all the actually it was not possible for me to complete a severe task without such help. So I pray the long life and good health for all the persons who have helped and co-operated me in my individual assignment.

1.0 CONTEINTRODUCTION TO ONLINE TOURNAMENT REGISTRATION SYSTEM

Sporting industry is one of the most profitable businesses all over the world. Many big events and tournaments were held all over the world. However, there seems lack of integrated system for proper management of those events. Therefore, to solve that problem, the system that will be propose is Integrated Tournament Management System which is this system can be more efficiently, effectively and innovative for the tournament that will be held. In addition, the reason why this system must be propose because of to give the more advance information for the users or people when to enter the tournament using this system. Moreover, it also will help the users feel easy to enter the tournament using the system such as to register and choose the type of tournament and games that they want. In the other hand, this system also, purpose to ensure that any sport tournament can be an easy system to use in order to create and display function of tournament, list of tournament, tournament schedule, result of the tournament, details of the players that join the tournament, and also world ranking. Other than that, the advantages that can be state is this system will manage every application with properly, complete information of list of the tournament and games schedule and also that can provide features of the tournament one of the best in the area. In the other hand, the uniqueness of this system, it not specific for one sport tournament but it will provide many more sport tournament such as chess, badminton, soccer, futsal and netball. So, the impact for them, of course it can be easy for them to choose the sport that they interested to join. However, the novelty for this system is, this system will provide more details of information about the tournament and of course it will be more efficient and effectively for the user. This system also can make the people more alert with the sport tournament that will be held and automatically it can attract the people to register and join the tournament. In a nutshell, with develop this system, it can be more efficient for the people to refer and get the information about the tournament from day to day

2.0 STATEMENT OF PRBLEMS

- Lack of platform to manage online tournament registration
- No proper read management practices

4.0 AIMS & OBJECTIVE OF THE PROJECT

- To encourage, facilitate & enable people of all ages to participate in sport & to assist in the provision of competitive opportunities for all levels and age groups.
- To support, develop, enhance and promote the online registration of sport tournament to be more global and at the surrounding area.
- The ability to store and display all update information event
- To provide and share sport tournament information
- To standardize data information sport tournament for more flexible to accommodate the requirements of tournament management system were held
- To providing integrated information online tournament management system programme with accurate and quickly.

5.0 SCOPE AND LIMITATION OF PROJECT

5.1 Scope

Scope of the project for this system is, online tournament registration system is the application to the project management to the creation and development of the tournament events. In the other hand, this system can be use from other people who want to join the online tournament.

In the other hand, this system also covers for students which are snowadays; students more interested with online tournament and want to be an online gamers. So that, develop this system, of course, it can give a good impacts for the students and also other people who want to play an online tournament. Besides, they also become able to get the information about the tournament easily when using this system. This is because, this system will provide not only focus on registration team, but also the list of tournament that can be registered quickly to join it.

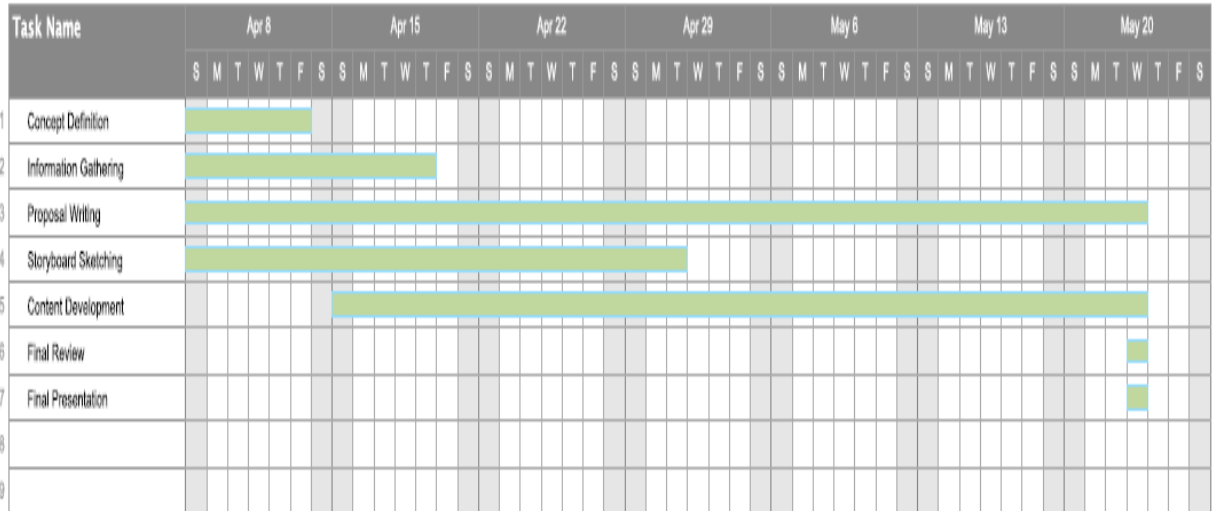

5.2 Limitations

As most people know that, in develop the system, there will be has a limitation because planned to create a system is not easy as we think. So, during developing the online registration system, there are a few limitation that can be state it.

- Lack of time to study the system structure and also the computer language. Therefore that, the developer has lack of knowledge regarding of computer language code such as PHP, HTML, JavaScript, and CSS and also do not know how to use and placed the language code into the right place to get the exactly what developer want to produce. And then, developer faces with WAMP application because not enough space for installation. So that, developer used the XAMPP installation in laptop.
- Difficult to understand the structure of the system that needs to develop, what is exactly need to fill in the system.

- Time consuming during to explore many of software that related to developing the system.
-

6.0 MILESTONE & GANTT CHART

7.0 ESTIMATED BUDGET & COST REQUIRE FOR PROJECT

As most people know that, cost and budget is one of important thing that need to be consideration when make some of the project. So, in order to develop this system, there are a few things that are including in order to finish this project.

NO	ITEMS	DESCRIPTION	PRICE
1	Laptop	Acer Notebook Model	RM2,400.00
2	Adobe Dreamweaver	AD CS5	RM130.00
3	Wamp Server Mysql Php Apache	Wamp Server 64bit	No Charge
4	Operating System	Window 8	RM400.00
5	Web Browser	Google Chrome	No Charge

8.0 HARDWARE & SOFTWARE DETAILS USE IN PROJECT

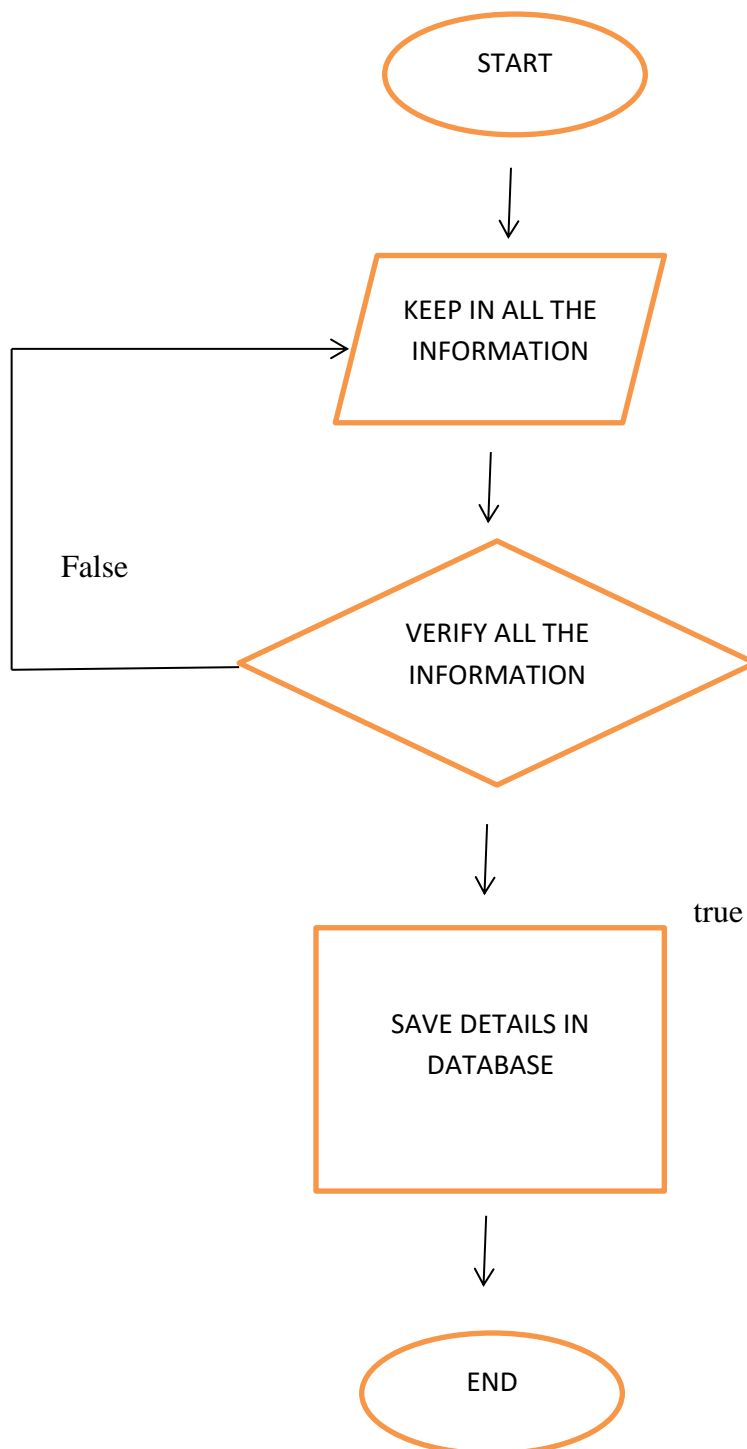

8.1 Hardware

ITEMS	DESCRIPTION	ESTIMATED PRICE
	<p>Acer's Aspire V5 is a Windows 8 laptop that features a Intel Core i5 that's rated at 1.7GHz and paired with 4GB of RAM. For graphics processing, it's powered by a Intel graphics card that shows on a 11.6" 1366 x 768pixels display. It comes with a 0.5TB HDD and weighs at only 2.3kg. The laptop comes with 1 Year</p>	RM2,400.00
	<p>Dreamweaver is positioned as a versatile web design and development tool that enables visualization of web content while coding.</p>	RM130.00
	<p>WampServer refers to a software stack for the Microsoft Windows operating system, created by Romain Bourd and consisting of the Apache web server, OpenSSL for SSL support, MySQL database and PHP programming language</p>	No Charge

 <p>The MySQL logo features the word "php" in white lowercase letters inside a blue circle. To the right is a blue outline of a dolphin. Below these is the word "MySQL" in a blue and orange font, with a registered trademark symbol (®) to the right.</p>	<p>MySQL is an open source relational database management system. Its name is a combination of "My", the name of co-founder Michael Widenius's daughter, and "SQL", the abbreviation for Structured Query Language</p>	<p>No Charge</p>
 <p>The Apache logo is a colorful feather with a gradient from red to yellow, and a black quill. Below it is the word "Apache" in a bold, black, sans-serif font.</p>	<p>The Apache HTTP Server, colloquially called Apache, is free and open-source cross-platform web server software, released under the terms of Apache License 2.0. Apache is developed and maintained by an open community of developers under the auspices of the Apache Software Foundation.</p>	<p>No Charge</p>

11.0 CONCLUSION

For the conclusion, online tournament registration system can be a good system for other people who like to play in online game. In the other hand, it will be a good platform for gamers to join the entire tournament that is provide in this system. In addition, the tournament for team event such as volleyball or football is suitable to use this system compared to individual event. For future improvement, payment gateway will be applied in this system since some of tournaments have fee submission to join. Therefore, it is better to provide payment gateway in this system. This system also can gives a good impact for communities as it allows them to join online tournament easily.
